

Mary (Molly) Uzoh, Founder/CEO Learning Right Technologies, LLC

Mary Uzoh is originally from Nigeria but a resident of San Jose, California where she is a City Small Business Development Commissioner. She is the founder/CEO of Learning Right Technologies, LLC (www.learningright.com), a small business enterprise in the heart of the Silicon Valley. Her company specializes in ICT consulting and educational services/tools. They provide curriculum R&D for instructor-led and web-based content: interactive multimedia instructional design, learning simulations, educational software, games and video production; e-learning, e-government, e-business, e-health such as EPIC consulting; and new program implementation; leadership and technical training; documentation, technical writing, e-library, users manual; database, knowledgebase, and project management. They run an online learning institute with over 3500 courses at www.rightvarsity.com. They facilitated the first Silicon Valley African Trade Expo (www.svtradexpo.com) and successfully propelled the first "Empowering Technology in Africa" event for Google. They also hosted two Silicon Valley Technology Trade Mission for Nigerian ICT entrepreneurs; and assisted the Silicon Valley Center for International Trade Development (SVCITD) with the first Ugandan International Trade Mission in 2003.

Ms Uzoh is actively involved in ICT workforce and capacity building, e-learning, OpenSource, functional education, and indigenous content development initiatives as well as programs dealing with technology empowerment of women, both in the United States and internationally. She has presented many papers/workshops/seminars on topics relevant to those issues that she drives. In addition to several local speaking appearances, she has presented papers and moderated sessions at the domestic and international conferences including E-Learn World conference in Quebec, Canada; E-learning Africa, in Nairobi Kenya, Ghana and many others.

Ms Uzoh is constantly exploring and evaluating cutting edge e-learning tools for contemporary learning environments for games, simulations, Web 2.0, and 3D virtual worlds that is easily portable into the emerging market. Hence, she conceptualized Right2Learn VM and took it to manufacturing stage. Ms Uzoh is a Ph.D. Candidate, with M.Sc. in Instructional Technology, and BA in Mathematics Education.
